LABORERS FOR THE PLANTERS

HAVING JUST RETURNED FROM Japan, where I have been in the interests of the labor supply for our plantations, I am prepared to furnish any number of laborers under the only practicable plan yet put forth.

MY PLAN as set forth in the prospectus of Ogura & Co., requires the planters to pay the passage money of the laborer to this place and other expenses after arrival, \$25 passage money for each male and \$20 for each female.

After investigation of the subject, I am satisfied that it is the only plan by which laborers can be recruited for this place and be reasonably sure of obtaining them.

I most respectfully request that your orders be placed with me as soon as possible in order to secure the approval of the authorities here and to enable me to have the laborers recruited quickly.

G. E. BOARDMAN,
4129-1m 1709-1w Agent for Ogura & Co.

SUGAR MEN IN COUNCIL

Fourteenth Annual Meeting of

Planters' Labor & Supply Co.

TO ORGANIZE UNDER NEW NAME.

Funds to be Raised by Direct Tax on Sugar Crop—Decrease in the Output.

Discussion of Fertilizers—Lengthy Report on Soils by Prof. Maxwell.

The fourteenth annual meeting of the Planters' Labor and Supply Company was opened in the new rooms of the association, Nuuanu street, Monday morning at 10 o'clock by President Schaefer. The attendance was as large, if not larger, than the last year's meeting, most of the plantations being represented by either managers or agents. Quite a number of town people were present, many of whom were interested in the association and its work. President Dole being among the number. Fertilizer manufacturers were represented by Messrs. Miller and Haas, of San Francisco and A. F. Cooke and Dr. Avadani, local dealers. Among the visiting managers were Messrs. J. A. Scott, C. C. Kennedy, W. W. Goodale, C. M. Walton, A. S. Wilcox, Cropp, Hind, W. J. Lowrie, Morrison and others.

The morning session was rather a short one, adjournment being made before noon. Most of the time was consumed in discussion of a satisfactory manner of raising revenue to liquidate back indebtedness and expense of conducting future work of the association.

President Schaefer opened the meeting in the following well-timed remarks:

"GENTLEMEN:—In the name of the Board of Trustees of the Planters' Labor and Supply Co., I welcome you to this annual session of your association and I thank you all for your attendance today, and particularly those who for the good of this society, have come from distant parts of these islands at a sacrifice to their individual interests.

"I trust that all those who are here today will not regret that they have come, as this annual meeting promises to be most interesting and instructive to all who feel an interest in the intelligent advancement of the agricultural pursuits of these islands.

"With your concurrence and authority this society has entered upon an enlarged sphere of activity and usefulness by the establishment of a laboratory and experimental station, and I am happy to say that the efforts of the Board of Trustees to establish this important work under the most competent superintendence, have been most successful in securing the services of Dr. Maxwell, for that position, who now, assisted by Mr. Crawley, as chemist, has full charge of the station. The sphere of this station may be enlarged in various directions and it will be left to your judgment to decide where the limits should be drawn and where the immediate extension in this line may be made to the best advantage.

"Dr. Maxwell's elaborate reports to this meeting on the subjects of specific fertilizers will be a guide for the future action of this association in this whole matter.

"The P. L. & S. Co. under its incorporated name, has under the changed condition of things outlived its sphere limited by charter provisions and a proposition will be submitted to you for incorporating the existing company and to reorganize the same as an association under a new name, the by-laws of which have been carefully prepared and revised and will be submitted for your approval.

"The secretary's report will more clearly place before you the work of this society done through its board of trustees in the course of the year now closed, while the treasurer will submit to you his financial statement with suggestions how to provide for the increased needs of the association for the new year.

"The annual report of the committees of this association will bring up for discussion the principal subjects of interest to planters, and among them I trust that the protection of the forests and of the sources of the water supply of these islands will receive your particular attention. This subject becomes of growing importance from year to year, and the Government, recognizing this fact, has officially expressed its willingness to cooperate with others interested to devise ways and means to stay the destruction of the remaining forests on the various islands. The Commissioner of Forestry and Agriculture in his report refers to this all-important subject at some length, and I confidently trust that his remarks will have weight.

"In closing these introductory remarks, I desire to express to you my earnest wish that the deliberations of this meeting may be fruitful of substantial practical results to the benefit of the agricultural pursuits of these islands and that the personal intercourse between the members of this society may bring them more closely together in the social sphere of life, thus engendering a better understanding and a heartier co-operation for the common good."

Secretary Bolte followed with his report, while in turn came the statement and recommendations of Treasurer P. C. Jones. On motion it was agreed to dispense with reading of last year's minutes, as they had been published in the Planters' Monthly.

The report of Secretary Bolte showed that a great deal of progress had been made in various directions: the inauguration of a laboratory and experimental station, with Dr. Walter Maxwell as director and J. T. Crawley as chemist. Dr. Maxwell had made a tour of the islands and visited nearly every plantation, familiarizing himself with the conditions of the various localities, thereby enabling him to give the plantation managers the benefit of his thorough, practical and scientific knowledge of agriculture and sugar-making. The weather had been favorable during the past season, but last season's crop fell short by 10 per cent of the previous one, leaving 149,365 tons for 1894-95, against 166,432 tons for 1893-94.

Treasurer Jones' report was lengthy and dealt in detail with the financial affairs of the association. It showed the company to be some \$16,000 in debt, most of which was incurred through the establishment of the new station and expense of maintaining the same. Mr. Jones recommended that an assessment of 5 cents a ton be placed on the output of the present season's crop, 149,365 tons, as a means of raising necessary funds to carry on the work and cover incurred expense. This was made in the form of a motion, followed by a like motion in the matter of taxing fertilizers.

He advocated placing a tax of 50 cents on each ton used by the planters, the amount to be paid by the manufacturers; 20,000 tons was about the amount used by the plantations yearly, and on that basis the sum of \$10,000 could be raised, leaving some \$6,000 to be paid by a direct assessment on the sugar crop. These recommendations provoked a great deal of discussion, Prof. Maxwell being called upon often to explain the cost of certain investigations, etc.

Mr. Hackfeld approved of fertilizers being used by the planters only after having been passed on by the chemist, with satisfactory results. He doubted the propriety of placing a tax of 50 cents on each ton of the product used in the islands. Most of the supply came from San Francisco, but arrangements were under way to furnish all that was needed by home companies. A State law of Louisiana made it obligatory to pay that amount, but he did not believe it could be carried out in Hawaii. The best way to reach a satisfactory conclusion was to refer the matter to a committee, and he named 25 cents tax per ton as a compromise and equitable amount.

Mr. Kennedy could not see the justice in taxing some of the plantations the cost of using fertilizers for the use of those not using any. He thought it best to raise the revenue required by a direct tax on the sugar crop. Mr. Scott took the same stand. Others favored and opposed the mentioned plan. After considerable discussion, coupled with several amendments, it was finally agreed to place an assessment of 25 cents on each ton of sugar raised this year, if it was found necessary, in order to clear off indebtedness.

Before the matter was disposed of, however, many recommendations were made and voted down, the sense of the meeting seeming to favor meeting all expenses by a direct tax on sugar and without making any charge for analysis of fertilizers. Professor Maxwell told the meeting that such a course would be utterly impracticable, as the chemists could not carry out the work. Thirty dollars was named as the cost of making an analysis, whether large or small. It was finally agreed to refer the matter to a committee of four to act in conjunction with Professor Maxwell, and on motion Mr. Morrison the chair named Messrs. Morrison, Swanzy, Cropp and Young.

Mr. Jones, speaking for the good and welfare of the association, said the board of trustees desired to make the institution a permanent and efficient one. In order to get the best results, it was absolutely necessary to have good men and pay them good salaries, amounts which would recompense the association and those in its employ. The trustees unanimously favored increasing Professor Maxwell's salary, commencing with the beginning of the new year. They felt he was deserving of the increased stipend, although the professor was under contract until next April at a much smaller salary. There was no opposition to the proposed change and the item passed as recommended. Mr. Crawley had proven to be a most valuable chemist and assistant. Professor Maxwell spoke in the highest terms of his services and the trustees had concluded his claim for an increased salary. It was unanimously agreed to materially increase his salary to date from October 1st. Further estimated expenses were named for paying a second assistant chemist and for carrying on laboratory work. If it was decided to begin experimental work in other respects a still further sum would be necessary. Professor Maxwell thought it best to defer that part of the work until this time next year. Adjourned till 1:30 p. m.

AFTERNOON SESSION.

The afternoon meeting of the Planters' Labor and Supply Company was called to order by the president at 1:45.

The committee appointed at the morning session regarding prices of analysis for fertilizers reported as follows: "The committee appointed to consider the question as to whether the charge for analysis of fertilizers shall belong to the manufacturer and seller or to the consumer, recommend that each planter having an analysis made shall pay to this association the cost of such analysis according to a scale of charges to be determined by the director of the experimental station and laboratory."

In recommending adoption of the committee's report Mr. Marsden said the matter had to do with others than sugar raisers. Coffee producers might want analyses made and in accordance therewith on which the basis of charge was made.

Secretary Bolte thought the manufacturers should be made to pay 25 cents a ton; it would not prove a hardship to them; but on the other hand be advantageous to increased sales. Professor Maxwell would see that the analysis the fertilizer is sold under is correct.

Mr. Young and others spoke on the committee's report, after which the same was adopted.

Mr. Swanzy proposed that the director and the trustees be a committee to establish a scale of prices. Adopted.

Professor Maxwell, director of the experiment station, then read his report on the soils of the islands. The report treated the matter on broad lines and brought out many scientific features of practical interest.

On motion of Mr. Marsden, the report was accepted and ordered printed for distribution.

REPORT ON LABOR.

The report of the labor committee, a lengthy, but very interesting document, was read by F. M. Swanzy, chairman of the committee. The areas in the islands are larger than at any previous time, which, with the improved conditions of sugar culture, will give the largest output of sugar of any year thus far. The crop is estimated at 190,000 tons. In spite of the efforts of the trustees there is a prospect of the labor supply falling short of the requirements.

It was hoped that the mission of Mr. Thurston to Portugal would result in the resumption of emigration from that country. The proposed importation of 800 Portuguese had resulted in 342 landing in April, and the prospect of more coming is uncertain. The work of Mr. Thurston and other Hawaiian representatives had been hampered by an organization existing in the Azores to obtain immigrants for Brazil. The Portuguese brought in April cost the planters \$65,000, which, when divided among the plantations, is a larger sum than can be afforded. A scheme is now on foot to bring Portuguese in small lots via the United States, and the planters have agreed to take a number equal to 20 per cent of the Japanese and Chinese laborers received on condition that the expenses shall not exceed \$100 per man. The efforts to obtain Chinese from Hongkong were reviewed. The number applied for was 1575, of whom 942 have been received. The Chinese who have thus far arrived seemed satisfied with their condition, and the employers, so far as heard from, have expressed satisfaction with the men.

The Japanese have done good service, and have given little trouble. Suggestions have been made for obtaining Germans for agricultural laborers. This matter is under consideration. The following census of laborers is given:

Portuguese (males), Oct. 19, '94, 4,700
Arrivals Oct. '94 to Nov. 19, '95, 342
Estimated Portuguese population 5,042

Japanese (males) Oct. 19, '94, 21,576
Arrivals Oct. 19, '94 to Nov. 19, '95, 2,307
Departures, 1,319

Total Japanese, 22,564

Chinese Oct. 19, '94, 14,114
Arrivals to Nov. 19, '95, 3,216
Departures, 1,628

Total Chinese, 15,702

These figures embrace all classes and take no account of mortality, hence the figures cannot be taken as exact. It is apparent however that there are a number not actively employed. Many of the Chinese and Japanese are employed in domestic service and on rice plantations. From particular supply by managers of all sugar plantations and of the principal coffee plantations the following figures showing the nationality of the field laborers thereon employed have been compiled:

	Men.	Wom.	Child'n.	Total.
Hawaiians	1,561	15	0	1,576
Portuguese	2,046	20	326	2,392
Chinese	4,677	3	0	4,680
Japanese	10,572	969	0	11,541
Others	379	0	0	379
Total	18,965	1,003	326	20,494

Of these laborers there are under contract:

	Men.	Wom.	Total.
Hawaiians	594	0	594
Portuguese	439	49	488
Chinese	963	—	963
Japanese	6,675	664	7,339
Others	107	—	107
Total	8,808	713	9,521

Not under contract:

	Men.	Wom.	Child'n.	Total.
Hawaiians	967	15	0	1,012
Portuguese	1,607	157	326	2,090
Chinese	3,614	3	—	3,617
Japanese	4,197	365	—	4,562
Others	272	—	—	272
Total	10,157	480	326	10,963

Comparing these figures with last year shows that the total number of male laborers now on sugar plantations is 129 above what it was in October, 1894; that there are 29 more contract laborers and about 229 more free laborers. The figures also show that of the three nationalities upon which the planters depend for field labor there are in the country about 3900 Portuguese, about 10,000 Japanese, and about 11,600 Chinese engaged in industries and occupations other than sugar cultivation.

Particulars obtained from thirty-four coffee plantations show that this industry employs 446 laborers as follows:

lowest: Hawaiians 25, Japanese 390, Chinese 11, Portuguese 7, others 4. It is not easy to account for the large surplus of apparently unemployed Japanese.

Answers to queries sent to each plantation show that there have been no serious strikes. Reports from the last lot of Portuguese vary, but all agree that it cost too much to bring them here. One half of the planters are satisfied with these men and one-half are not. The Oporto men are especially hard to get along with.

The desertions have been about 450 90 per cent of which were among the Japanese. The passbook system has proven a good move. Planters complain of being short of labor for the coming campaign. About 3,500 men will be required to deal with the next crop. The coffee planters seem to be well supplied with laborers. Roughly speaking, a coffee plantation of from 200 to 250 acres requires from 75 to 100 laborers, with perhaps 30 additional in crop time.

This report was accepted and ordered printed. The report on cultivation was read by W. W. Goodale. He remarked upon the varying conditions met with on different plantations; considered the losses from not stripping at all would as a rule be less than those that are caused by too frequent or too high stripping; the report favored irrigation.

Discussion of the effectiveness of stripping brought out varying opinions. Mr. Morrison did not favor it. Mr. Kennedy said that owing to the wet weather stripping is a necessity. Mr. Lowrie thought there was not much necessity for stripping in a dry district.

J. A. Scott read the report on machinery, in which was noted many important changes throughout the country. The roller mills are giving better results than the diffusion plants; opinions differ as to the effectiveness of two-roller and three-roller mills. The report of the Ewa chemist on superheated clarification was read. Mr. Scott considered this system useful in districts where the juice is the same standard as at Ewa, but with juice of ordinary purity he could not consider it necessary. The use of molasses in burning trash was touched upon; also the patent wire-chute landings explained and favorably commented upon.

In the discussion of the report Mr. Young told of his investigation of the continuous discharge centrifugals. They are a success with high grades of sugar; it is a question whether they will work with low grades. Mr. Young was convinced that the two-roller mill was superior to the three-roller mill. Mr. Morrison found the use of molasses in burning trash a success. Mr. Scott's report was accepted and ordered printed.

H. M. Whitney said that owing to the absence of W. R. Castle and W. G. Irwin he had not prepared a report on reciprocity. He gave a few remarks on the benefit derived therefrom. In this connection President Dole referred to the reported attitude of the California wine growers toward the reciprocity treaty. Mr. Miller, who has traveled through California, said he did not think the agitation would amount to anything. Mr. Schaefer was of the same opinion.

President Dole remarked upon features of the labor report. It showed there were many Japanese in the country who were not employed on the plantations. What are they doing? What proportion leave the plantations and for what reason? He also spoke of the sanitary conditions of plantation quarters, and said, in consequence of the cholera epidemic, the Government intended to investigate the sanitary conditions on plantations. He suggested that the plantations make the surroundings so pleasant that laborers would remain.

Mr. Lowrie of Ewa thought the laborers' quarters were in good condition. The Japanese were a roving people. They go away, but come back after a while. He, as well as others, remarked on the trouble of making the Japanese keep their quarters clean.

Mr. Scott said much of the floating population became professional gamblers and lived on the people at work in the field. The only way to find out what they were doing was for the Government to take a census.

Mr. Swanzy referred to the necessity of a registration law. Mr. Dole said this matter was in the hands of a commission which would report at the next Legislature.

During the latter part of the meeting, Mr. Lowrie spoke of the profit-sharing system of Ewa. It had been successful except among the Portuguese. They could not agree for more than a month at most. Chinese and Japanese were better. Mr. Kennedy reported the same results from his experience.

Shortly after 5 o'clock the meeting adjourned to 10 o'clock Tuesday.

SOMEBODY TOLD ON HIM.

School Teacher at Haunala Arrested—Released on Bail.

A party named Breckinridge, who teaches school at Haunala, on the other side of this island, was arrested yesterday for having violated a certain section of the Penal Code. The crime was supposed to have been committed near where the gentlemen teaches the young idea how to shoot. The name of the other and necessary principal was not made public, but is known to the police officials. Deputy Marshal Hitchcock made a special trip over to Haunala for the purpose of inquiring into the matter.

Breckinridge was released on bail during yesterday.

KATE FIELD'S OPINION.

She Has It With Her, but It's Inaccessible.

WILL WRITE ON ANNEXATION.

In a Mosquito-proof Room She Feels Safe—Some Ideas Regarding Population—A Lover of Old Glory—Suggestions as to Laborers—Negro Labor.

Kate Field, the well known writer and lecturer, is at the Hawaiian Hotel, where she has comfortable quarters. Knowing her antipathy to mosquitoes, the manager of the hotel provided the distinguished woman with

MISS KATE FIELD, EDITOR OF KATE FIELD'S WASHINGTON—A BRILLIANT WRITER AND LECTURER.

rooms so well protected by wire that the mosquito has no more chance to become on familiar terms with her than a newspaper man has to interview the Czar of Russia. And Miss Field likes the place.

"So you do not want my ideas on woman's suffrage. Then you are different from the majority of newspaper representatives; they seem to enjoy having me say that woman's rights are but the rights of men. Now you see I have told you in a half dozen words what woman's rights should be and are."

"True enough; but we knew all that before you came. 'Woman's rights' is not the most important topic of thought or conversation among the people here; we are interested in other things more than that, for instance: What about the annexation of the islands?"

"Precisely what I came here to find out," remarked the little woman. "Located as I have been in Washington, I have had opportunities for feeling the pulse of the people there; now I want to ascertain the views of the people on the islands."

"You mean that you will mingle among the members of both political parties here?"

"Both. If I felt certain that there are not two parties, I would feel that the task is an easy one; but I am told there are more."

"In a sense, yes! because people whose views vary to an extent that place them in a different position from others, but they do not constitute a party. You may figure on two parties—the ins and the outs."

"Then it will be plain sailing. I came here, you understand, entirely unbiased. Oh yes; I have an opinion—everyone has, but I do not intend that it shall influence me in my letters to the Times-Herald. I will not let it out, so to speak, and form a new opinion after I have visited among the people."

"Do you believe the country will be annexed, or, rather, do the people of the United States favor annexation?"

"Some people do, others do not. Your vast Asiatic population is against it. The people there, or, rather, an element of the population, opposes the annexation of territory where the population is so decidedly mixed as it is here. But there is another side. The people there have not recovered from the shock at the news of hauling down the American flag. Sentiment, you may say, but it is sentiment that makes the world go round. They do not consider the reasons for its going up, but when once in position over a Government building there was a desire in the heart of every one to have it remain. As to any opposition there may exist here to America, let me say it is wrong. From what I have gathered, from books I have read and from debates by the bright men in Congress, I believe that the prosperity of the peo-

ple here is due to America. There should be no division of opinion upon that, and if a preference is to be given any one it should be America."

"That has never been disputed here, but there is a point where the worm will turn. The islands, metaphorically speaking, were carried across an ocean and a continent and laid on the steps of your capitol. The broom used in the new administration swept them off and here we are."

"That is very true, but that is scarcely enough to make a worm, as you say, turn. Nor does it release the people here of their obligations to the United States for the prosperity they have enjoyed during the reciprocity treaty. The minute you do that you extend an invitation to some other nation to come in and take possession."

"But about the objections people have to annexing us on the score of Asiatics. We have an industry that can be best worked by Asiatic labor. The climate is such that people of other nationalities cannot compete with them as field laborers."

"You have the Portuguese!"

"Yes! but do you know the percentage of that race who renew their contracts at their expiration? No! Well, it is very small. They complete their term of service and then they go into

sure Hawaiian matters will have some attention in Congress."

"When will you begin your inquiries, Miss Field?"

"Inquiry? You speak as though I was a Blount. I shall gather information from the people I meet, through intercourse with them. Already I have met President and Mrs. Dole and Minister Damon and wife, and ever so many more charming people; and see here," picking up a double handful of letters addressed to prominent people, "I expect to meet all of these people; they don't know I have them, so if I don't post them they will not call on me, and you know I want to meet them all. The first thing I will advocate after I get settled here will be a cable. Fancy getting up in the morning and not being able to learn what is going on in the rest of the States. I don't remember ever having been in such a position before, and I confess I don't like it. I presume I can get used to it just as the business men can reconcile themselves to conducting their daily affairs without reading the market reports until they are a week or more old."

When asked if she would visit the other islands, Miss Field remarked that she would like very much to visit the crater and she probably would.

As a writer and lecturer Kate Field is known the world over, and her opinions on matters of a national interest are courted by some of the most prominent members of the Senate and House in Washington. Her paper, Kate Field's Washington, contained articles from her pen that were quoted in half the papers in the States. Having lived so long in Washington she has paid more attention to national politics than local ones. The G. A. R. recognized her efforts in a certain direction and presented her with a magnificent badge studded with diamonds. Again, for her efforts in having works of art put on the free list in the United States, the Republic of France elected her an officer of public instruction and presented her with one of the highest decorations of that government. Her lectures have been a factor in changing affairs in Utah, where she is looked upon with great favor.

HILO WANTS A ROAD

To Lots in Kaunama District, in the Vicinity of Hilo.

Resolutions Adopted—The Government Asked to Build Without Delay. Numerous Signers.

At a meeting of the Kaunama Association, composed of persons owning Government land in that tract near Hilo, the following resolutions were adopted:

Whereas, At a meeting of certain purchasers of lots laid out by the Government on Kaunama, and owners of adjacent lands, held at the court house in Hilo, Hawaii, on the evening of December 7, 1894, the following resolutions were adopted:

Whereas, The Hawaiian Government has set aside for the purpose of settlement certain of the land of Kaunama, said land being within a comparatively short distance from the town of Hilo, Hawaii; and

Whereas, A large number of lots on said land of Kaunama were sold at public auction under certain restrictions and conditions having for their object the acquisition of the same by bona fide purchasers; and

Whereas, The whole of said tract, as well as adjacent land now owned by the Government, as well as large lands now owned by private persons, are being opened up for settlement and will greatly aid to the progress and commercial development of the town and port of Hilo; and

Whereas, All of said lots on Kaunama, as well as the adjacent land, are accessible only by a bridge trail over and along the lava flow of 1881; and

Whereas, There is every reason to believe that a wagon road from Hilo to and through said land, by way of Rainbow Falls could be constructed at a comparatively small expense; therefore be it

Resolved, That the undersigned, purchasers and settlers on the land of Kaunama, and owners and lessees of adjacent lands, do hereby petition the Hawaiian Government, through our regularly elected Representative and Senators, for an appropriation sufficient to construct a road to and through said land; and be it

Resolved, That a copy of these resolutions and petition be forwarded by the secretary to our representative and to the Senators for the island of Hawaii, and that a copy of the same be furnished to the Minister of the Interior and to the press for publication.

(Signed) J. G. Serran, John E. Taylor, Joseph Vierra, Levi C. Lyman, per F. S. L.; Ellen G. Lyman, H. C. Hitchcock, W. H. Williams, Thos. Mutch, M. K. Williams, Charles Auld, W. C. Borden, Alex. Cookburn, J. S. Canario, Ida B. Castle, by A. B. L.; Catherine Vierra, L. Turner, J. T. Sylla, John Lycouras, W. R. Castle, by A. B. L.; Gardner K. Wilder, for lessees of Waihanalei; Mrs. J. L. Richardson, William Ebeling, William R. Castle, by A. B. L.; A. E. H. Moore.

Thereafter, it is resolved that we call the attention of the Executive to the fact that as yet no steps have been taken looking toward the construction of said road, and that we urge that steps be taken immediately, and urgently request that the sum of \$5000 be appropriated for the same.

The wife of Mr. Leonard Wells, of East Brimfield, Mass., had been suffering from neuralgia for two days, not being able to sleep or hardly keep still, when Mr. Holden, the merchant there, sent her a bottle of Chamberlain's Pain Balm, and asked that she give it a thorough trial. On meeting Mr. Wells the next day he was told that she was all right, the pain had left her within two hours, and that the bottle of Pain Balm was worth \$5.00 if it could not be had for less. For sale at 50 cents per bottle by all dealers. BROWN, SMITH & Co., agents for H. I.

Dr. J. Collis Browne's Chlorodyne. Vice-Chancellor SIR W. PAGE WOOD stated publicly in court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR OF CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to. See The Times, July 13, 1884.

Dr. J. Collis Browne's Chlorodyne is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm, refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted. It is the Great Specific for Cholera, Dysentery, Diarrhoea.

The General Board of Health, London, report that it ACTS as a CHARM, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states: "Two doses completely cured me of diarrhoea."

Dr. J. Collis Browne's Chlorodyne is the TRUE PALLIATIVE in Neuralgia, Gout, Cancer, Toothache, Rheumatism.

Dr. J. Collis Browne's Chlorodyne Rapidly cuts short all attacks of Epilepsy, Spasms, Colic, Palpitation, Hysteria.

Important Caution.—The immense Sale of this Remedy has given rise to many Unscrupulous Imitations.

N. B.—Every Bottle of Genuine Chlorodyne bears on the Government Stamp the name of the inventor, Dr. J. Collis Browne. Sold in bottles 1s. 1d., 2s. 6d., and 4s. 6d., by all chemists.

CONNECTED BY WIRE.

Completion of the Kona-Kau Telephone Line.

CONNECTION AT VOLCANO HOUSE.

Audible Conversation Two Hundred and Forty-five Miles—Circuit Around the Big Island—Advertiser Man First to Use the New Wire.

The people of the big island are justly proud of the several telephone lines now in successful operation there. Until recently the residents of Kona and Kau were somewhat out of the world, in the matter of telephone connection with the windward side of the island. Now that the new Kona-Kau line has been completed almost a circuit of the island of Hawaii is possible by its connection.

At 4:30 p. m. Wednesday, November 6th, Manager L. S. Augst and assistants Joseph Pritchard and Bert Stone connected the new line at the Volcano House with the Hilo end, thereby making it possible to carry on conversation from Kailua, Kona, to Kohala, a distance of 245 miles. Work on the new line was commenced on the morning of July 15th from Kailua, the Volcano House being reached three months and a half later. It requires much diligence and hard work to build and equip the route, especially through the Kona, where bad volcanic strata were met with, making it necessary to drill and blast holes. Not the least of the many obstacles met with and overcome by the constructors was the heavy forest through Kona, the line having to be virtually new for quite a long distance. From Kau the work was not so difficult, but in many places a great deal of blasting and cutting had to be done in order to erect poles. Ten miles from Naalehu a stretch of lava flow several miles in length had to be crossed. To accomplish the work of erecting the line over this barren stretch—not the least sign of vegetation being apparent—was, indeed, a laborious task, but with a determination which marked the construction from beginning to end the work was successfully carried out.

On the whole the line was the most difficult ever constructed on the island, and necessitated the expenditure of several thousands of dollars, to say nothing of the severest exposure encountered by the builders. The length of the new company's wire, from Kailua to the Volcano House, is about 110 miles, and so perfect is its construction that conversation can be carried on from the two points named without raising the voice above the ordinary tone. There will be two central offices—at Naalehu and Kailua. Joseph Pritchard will be in charge of the former and Manager Augst the latter. Wires radiating from these centers will connect ranches, coffee plantations, wharves, business houses and private residences. Already there are a large number of applicants for phones, and when the instruments are placed in position the line will be in working order for the respective places along the route. At present Naalehu, Kau, Houmao and other places can be reached by connections independent of a central office; but when everything is completed, the different subscribers can be reached from the respective central offices. The instruments to be used are the latest improved long distance phones. These are manufactured in Germany, and have been proven to be the best of the kind in the world. A sufficient number have been ordered by Manager Augst for his and the other companies on the other island, and when the new phones shall have been put up there will be nothing lacking to make the telephone service on Hawaii most perfect in every detail.

In honor of the completion of the new line and connection at the Volcano House, that most excellent of hosts, Col. Peter Lee, furnished a splendid lunch to Manager Augst, his assistants and their correspondents. Not to be outdone in hospitality and in celebration of an extremely arduous task, Manager Augst ordered of the "lemonade and soda." An ADVERTISER representative, who was spending a vacation at that famous hostelry, the Volcano House, was given the distinction of first using the new line, conversation being held with a party at Kailua, 110 miles distant. The sound was clear and distinct. A few days later Manager Augst conversed from Kailua to Kohala, via Volcano House, 245 miles away, the talk being overheard by interested persons at the Volcano House and Hilo.

This article would not be complete without some reference to Mr. Augst and his very capable assistant, Joseph Pritchard. Both are well known to readers of the ADVERTISER, having formerly been manager and chief line man respectively of the Mutual Company in Honolulu. No better men than these can be found in any country when it comes to constructing and operating telephone lines. Besides being most capable electricians, they are as well affable and trustworthy.

NEWS NOTES OF PAHALA.

Heavy Weather on the Coast—Dr. Capron Departs.

PAHALA (Kau, Hawaii), Nov. 20.—There was a severe earthquake this morning at 10:30 o'clock.

A kona has been blowing for several days, which made it very hard for the W. G. Hall to discharge her freight and take sugar. On the uptrip it was impossible for the steamer to touch at Hookea and she had to carry the freight on to Kau.

Geo. Robertson, manager of Brewer

& Co., has been here two weeks, but returns to Honolulu on the Hall.

Dr. V. J. Capron and wife and Miss De Lion leave for Honolulu on the Hall and will go to Vancouver December 21. Dr. and Mrs. Capron will return in about two months. Dr. McWayne of Kona will act in Dr. Capron's place while he is gone.

W. Doherty of the Half-Way House would like to see the tourist travel start up again.

The overland mail does not arrive any earlier at Pahala. The last trip the carrier arrived at Pahala late in the afternoon, his excuse being that he had to cook his own breakfast.

Mr. Walton leaves by the steamer Hall to visit Mrs. Walton, who is very sick in Honolulu.

Judge Waipulani has been striking terror into the hearts of Japanese thieves. The first one brought up was arrested for stealing from the Punaluu warehouse and got six months. The next was caught stealing from Hiles store, got two years and \$100 fine, and the last for stealing from the Honuapo warehouse and will have a hearing in a few days.

The summit of Mauna Loa is covered with snow and presents a very beautiful sight.

KONA TEACHERS CONVE.

Two Days' Meeting, with Interesting Discussions.

Property-Holders Discuss New Government Roads—New Lumber Yard at Kailua.

NORTH KONA (Hawaii), Nov. 21.—The Teachers' Convention for North and South Kona was held at Holuolua school-room on the 14th and 15th inst. There were sixteen teachers present, viz., Mrs. M. F. Scott, Mrs. Suter, Miss Florence Scott, Mr. and Mrs. N. E. Lemmon, H. T. Mills, Thomas Aiu, Mr. and Mrs. Amalu, Sam Pitero, Thomas Hase, William Wright, Jr., Miss Cornelia Kaelele, Miss Mary Huomanawani, Moses Kane.

The meeting opened with Secretary Aiu in the chair, President Wilson being absent. The first proceeding was election of officers for ensuing year, as follows: President, Mr. Lemmon; vice-president for North Kona, Mrs. M. F. Scott; for South Kona, Mr. Amalu; secretary and treasurer, Miss Florence Scott. The program for first day began as follows: Reading of the school laws by Thomas Aiu, which was followed by an interesting discussion; reading, by Mrs. Suter, of a very good paper on "Busy Work;" Mr. Lemmon read a paper on "The Art of Teaching;" a paper by Mrs. Amalu on "Primary Work;" an illustrated talk on "Third and Fourth Reader Language Work" by Mrs. M. F. Scott; Mr. Amalu, on "Writing," spoke of the elements of Payson and Dutton's system.

The second day's exercises began with an animated discussion on the school law regarding attendance. Miss Scott then gave a talk on a method of teaching technical writing in the first part of the course of study. H. T. Mills followed with a paper on the "Essentials of Methods." After recess, Miss Scott introduced Leland's method of drawing and designing, illustrating in a very clear and attractive manner on the blackboard. This was followed by a most interesting paper on "Psychology" by Mrs. M. F. Scott. The teachers then discussed the Summer School question, and, after deciding to hold the next meeting at Kona-waena in March, adjourned, well satisfied with the results of the convention.

Mr. Bruner has been in the district for a week, looking after road work for the Government. A meeting of property holders has been called for Saturday to discuss with Mr. Bruner his proposed line for the upper road. His plan is to straighten the road as much as possible. This will cause it to deviate considerably, at certain places, from the present "cow trail." As the proposed change will leave a few residences farther from the main road, it is understood it will meet with opposition. But it is to be hoped that the general welfare of the district will overrule personal interests.

George Clark has opened a lumber yard at Kailua, in partnership it is understood, with John Ems, of Honolulu.

Mr. and Mrs. N. E. Lemmon, of Pahoa, are settled in their new home and have their school duties well in hand.

Miss Edith Wallace, of San Francisco, is visiting her cousin, Mrs. Katherine Scott.

Dr. and Mrs. Whitney have returned to Honolulu after an extended visit at Mrs. Greenwell's.

A rainstorm with thunder and lightning began on the afternoon of the 17th, and it was almost two days before it settled to the usual serene sunshine. The nights are getting decidedly chilly.

Second Degree Murder. Wong Fook, the Chinaman who stabbed a countryman to death about two weeks ago, was convicted of murder in the second degree last night.

Attorneys Dole and Davis, who had been assigned by the Court, made masterly speeches in the defense of the prisoner, and ex-Judge Hartwell prosecuted in his usual quiet manner. At 7:45 o'clock Judge Magoon charged the jury as impartially as ever a charge was delivered from the Hawaiian bench. While the pleadings and charge were being made the prisoner sat in a semi-dazed condition with bowed head. During the afternoon he was examined in the law library by two physicians as to his sanity, but, whether from fright or otherwise, he could not be made to answer. From his actions and the fact that absolutely no motive can

be found for the murder the impression seems to be that the man's mind is affected.

Diplomatic Reply.

Miss Playne: "Is it true that you said the mere sight of my face would make a man climb a fence?" Hargreaves: "I—er—I meant, of course, if the man was on the other side of the fence."—Cincinnati Enquirer.

SEMI-WEEKLY.

ISSUED TUESDAYS AND FRIDAYS

W. R. FARRINGTON, EDITOR.

TUESDAY, -- NOVEMBER 26, 1895.

SAN FRANCISCO reporters do not find Minister Hatch filled with a budget of news for them, and it is highly probable that Washington newspaper men will have the same experience. At any rate, we shall have an opportunity to discover what effect shutting the door on newspaper men will have.

THE Official Gazette of Japan gives the official cholera returns for October 31st throughout the country as 65 cases and 86 deaths, making a total of 55,611 cases and 38,829 deaths since the outbreak. From these figures it appears that Japan has seen something of the scourge, although the officials have a way of keeping the facts quiet until the scare is over.

WHEN Commissioner Davis arrived in Vancouver after his short stay in this city he told a News-Advertiser reporter that "the heat in Honolulu was tremendous and what was left of the non-residents by the sun during the day was finished by the mosquitoes at night." Mr. Davis evidently made a mistake in not being armed with one of Kate Field's mosquito cages and a portable electric fan.

A DEPUTATION of West Indian merchants and planters recently called on Colonial Secretary Joseph Chamberlain to set forth the injury being done the West Indies by the bounties given for sugar production in Europe. Mr. Chamberlain promised to submit the matter to his colleagues, but suggested that it might be well for some of the British dependencies to make their prosperity less bound up in sugar planting, at the same time pointing out other resources that might be developed without in any way causing the sugar industry injury. In these days of sharp competition, no country can afford to put all its eggs in one basket.

W. N. ARMSTRONG was requested to write an unbiased history of Hawaiian affairs, and declined because it couldn't be done. Kate Field has been sent down here by a newspaper proprietor to accomplish a task somewhat similar, and it's "got to be done." With the factional feeling that exists in this country and the United States on Hawaiian politics, it is not at all probable that all her critics will strew her pathway with complimentary roses, yet Miss Field's record in newspaper work is a guarantee that she knows something of human nature and will come as near following the straight and narrow path of truth as is possible. It is not at all probable that she will pat every one on the back and call them good fellows. Consequently her unbiased conclusions will be read with not a little interest, both at home and abroad.

COMMISSIONER HARRIS' report covering the school year ending November 30, 1893, shows the number of pupils enrolled in the schools of the United States as 15,000,000, or nearly one-fourth of the entire population. The enrollment of pupils in the public schools increased nearly two per cent. over the preceding year, and the average attendance three and one-half per cent. In the last twenty years the value of school property in the country and the common school expenditure has more than doubled. In professional education the theological schools are more heavily endowed than any other class of institutions. The figures given show a steady advance in the education of the masses which is highly encouraging to a country whose prosperity depends upon the educational standard of the middle class.

LET THE OPPOSITION SPEAK.

Consequent to the approach of Thanksgiving Day several of the kind-hearted citizens of this city are agitating the question of liberating the few political prisoners who are still detained in Oahu prison as a result of the trouble of last January. Sometime today or early Monday morning a petition signed by a good number of the representative business men of the city will be placed before the Executive asking that "the Executive exercise its clemency" toward the remaining prisoners. The ADVERTISER has been placed on the list of those opposed to the pardon of political prisoners and very properly so. With the exception of the release of members of the rank and file on the Fourth of July this paper has opposed every movement pointing to the conditional or unconditional pardon of the leaders of the January fiasco. We said at that time, that the future action of the Government toward the remaining prisoners ought to depend upon the attitude of the friends of the prisoners. Provided they showed a disposition to accept the situation, gave up the idea that powder and bullets were the proper weapons for political warfare and, if they must continue to oppose the present conditions, would resort to the numerous legal methods at their disposal for settling political differences, then, and then only, would the Government be justified in extending its pardoning power to those who were still suffering penalty for instigating rebellion among the ignorant classes.

We have listened attentively to the claims that the release of political prisoners would conciliate the natives, forever restore peace and happiness, and have a good influence abroad; but we have failed, as has every one else in the community, to see these claims justified. The country has enjoyed peace and quiet, but through no special effort of the enemies of the Government to conciliate the natives or bring themselves to believe that there is anything to do but stand on the outside and find fault with the general administration of affairs. It is notable that the majority of those who signed the petition to be placed before the Executive are men who are supporters of the Government. The petition shows what has always been true, that the supporters of the Republic bear their opponents no ill-will, but it does not bring out the vital feature—the friendship of the opposition.

We do not anticipate or ask for a mutual love-feast. But we do believe that it is about time to realize on the promises that have been made. The Government has always been ready to accept and reciprocate the kindly offices of its opponents, and nothing could have a better effect than a public expression, by petition or otherwise, from those, who for reasons best known to themselves, have seen fit to stir up dissension. When this expression is forthcoming, and our friends the enemy give evidence that they are willing to follow civilized and common sense methods, then we will add our voice to those who wish to see the prison doors opened—but not till then.

HOW NEWSPAPERS ARE READ.

One of the features of the opening session of a literary and debating society of the Westbourne Park Institute in England was an address by President Clifford on, "How to Read the Newspapers." The subject is a somewhat novel one but particularly interesting in these days when the newspaper plays such an important part in the daily life of the individual. Dr. Clifford opened his address by laying down the principle that five-sixths of the literary food now comes through the newspaper press. Men have their special newspapers, and not only men, but women and boys and girls have newspapers devoted to their entertainment and instruction. Newspapers are served to the people from early morning till late at

night and except in the outposts of civilization, it is almost impossible for a person to go to bed without a knowledge of the leading events of the day throughout the world. Dr. Clifford says that the great books now are read only by a few. The life of the present day is too crowded for men to read Spenser's "Faerie Queen," or to go through the twelve books of "Paradise Lost." A great book requires a trained mind and time to peruse it, and "trained minds" among the reading public of the present day are few. The lecturer remarked that it is a pleasing thought that the newspaper is on the side of justice and has not only literary form but also noble enthusiasms, and is prepared to undertake a crusade in behalf of the weak and suffering members of the community. He paid due honor to the energy and sincerity which mark the work of the daily press, as well as its daring and brilliant achievements.

The newspaper reading public he divided into four classes. The man who reads for "news"; the other who reads from a business standpoint and pays special attention to the "ads" and "wants"; then the man who reads for the sensations and declares there is nothing in the paper unless some one has been murdered or some tragedy has occurred; and then the man of leisure, who reads his newspaper much as he smokes his pipe, and who dreams over the most exciting sporting events, and only treasures the gossip that he wants to hear. Finally there is the man like Dr. Clifford, who reads the papers for the picture of daily life which they give and gathers lessons from the evil as well as the good in the world. Dr. Clifford is apparently a man who recognizes that the office of a newspaper is not to suppress the news, but rather to tell the story of passing events, whether they are good, bad or indifferent. He recognizes that while the paper has a responsibility in the character of the news which it sets forth, there is also a certain responsibility on the part of the reader in determining to what use he puts the material which he reads.

DURING the meeting of the Planters' Labor and Supply Company today and tomorrow there will be brought out in the reports of Prof. Maxwell, director of the Hawaiian experiment station, instituted under the patronage of the planters, a line of research of paramount importance to the development not only of the sugar industry but of every branch of agricultural work in this country. The agriculturist has come to realize that the scientist with his test tubes and reagents is one of the most important allies that he can call to his assistance. In every State in the American Union we find experiment stations with an able corps of scientists who are studying from a scientific standpoint the conditions which the agriculturist has to face, and who set forth the results of their work in a form to enable the farmer or planter to obtain the best returns from the land under cultivation. The Hawaiian experiment station has been in existence only a few months, but we believe that before many more months have elapsed the benefits of the work being carried on by the planters will become so much in evidence that efforts will be forthcoming to make the Hawaiian experiment station a national institution complete in every detail for the study of whatever may interest the sugar planter, coffee planter, fruit grower, or ranchman. To the sugar planters is to be given the credit of putting the scientist in the field and proving the financial returns gained from his work. It is to be hoped that this progressive spirit will be absorbed by more of our intelligent citizens, thus enabling the country to realize more extensively on our natural resources.

Good advice: Never leave the house on a journey without a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. For sale by all dealers. BENSON, SMITH & Co., agents for H. I.

THE HILO TRIBUNE.

The much-talked-of and long-looked-for Hilo Tribune, the newspaper organ of some of the people of the island of Hawaii has arrived, and is a decidedly interesting sheet from an editorial standpoint. The editor occupies three columns and a half in explaining "The Beginning," and after perusing this carefully one is inclined to be still very much in the dark as to what the ending will be. The opening lines are full of the usual good promises and high aspirations which accompany the first issue of a newspaper, and, after running down the list of standard generalities it launches forth into sort of a semi-particularization of the position it will take on questions now before the country. The extra space devoted to this last explanation makes interesting reading, to be sure, but the whole business could have been covered by the simple statement that the Hilo Tribune will support the Republic, but it doesn't think the present Republic is arranged just according to its idea; that it will support annexation, but will reserve the right to pull a few feathers from the tail of the American eagle before it will support the measure with all the heartiness of its inmost soul. It is in the final expansion on the administration and annexation that it spoils the good effect of the statement that the Tribune "is not a party or factional organ."

From the color of the "nigger" whose head crops out from between the lines, it looks very much as though the Tribune has prepared to swing the political threshing flail according to the opinions of the most conservative of the conservatives of Hilo. Our principal criticism is that the editor would have done better to have expressed these sentiments in a few flat-footed expressions. The salutary puts the Tribune in much the same position as the man who went from Honolulu to Maui by the way of San Francisco.

On the whole, however, the Hilo Tribune is a very creditable paper. It is pledged to work for the development of the island of Hawaii and we believe it will be a potent factor in securing for the different districts of that island many needed improvements. There is plenty of good work for it to assist in, and we trust that the fondest financial and philanthropic aspirations of its proprietors will be realized.

We received by the last mail from the States copies of a pamphlet issued by Minister Castle containing a brief statement of facts of interest to those desiring to take up lands or become residents in the agricultural districts of this country. The pamphlet follows conservative lines, telling the people that while Hawaii is a good place to live, there is no royal road to wealth or prosperity. It sets forth the conditions here in a manner to discourage the tramp and bring to our shores a class of citizens willing to work and give material assistance in developing the country.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S
WORLD-FAMED

Blood Mixture

THE GREAT BLOOD PURIFIER & RESTORER

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scoury, Eczema, Pimples, Skin and Blood Diseases, and Sores of all kinds, its effects are marvellous.

It Cures Old Sores, Cures Ulcerated Sores on the Neck, Cures Ulcerated Sores on the Face, Cures Blackheads or Pimples on the Face, Cures Scoury Sores, Cures Cancerous Ulcers, Cures Blood and Skin Diseases, Cures Glandular Swellings, Cures the Blood from all Impure Matter, From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietors solicit sufferers to give it a trial to test its value.

THOUSANDS OF TESTIMONIALS

From All Parts of the World.

Sold in Bottles of 25, 50, and 100, each containing six times the quantity, 1 lb., each—sufficient to effect a permanent cure in the great majority of impure blood cases. BY ALL CHEMISTS and PATENT MEDICINE VENDORS THROUGHOUT THE WORLD. Proprietors, THE LONDON AND NEWCASTLE COGNAC DISTILLERS COMPANY, Limited, England.

Caution.—Ask for Clarke's Blood Mixture, and beware of worthless imitations or substitutes.

BEET SUGAR FACTORIES.

Claus Spreckels May Erect Two on the Coast.

Since his return from Europe, Claus Spreckels has been talking of establishing one or more new beet-sugar factories in this State says the San Francisco Examiner of November 14.

Last week he visited several proposed sites, but decided upon nothing definitely. The sites visited were near Woodland and Sacramento.

The gentleman is secretive as to his intentions, fearing that if it should become known that he was after this or that body of land the owners of the property would hold their property at figures much higher than its real value.

From his son, John D. Spreckels, and from other sources it was learned that he expects to invest about \$1,000,000.

The elder Spreckels believes that the erection of more beet sugar factories will do much to promote the growth and solid prosperity of the State. He says that it will encourage others to follow his example and invest their idle capital in ways that will benefit California.

John D. Spreckels when seen last night confirmed the report of his father's proposed investments. "The old gentleman," he said, "is full of vim. He is enthusiastic in his efforts to create new enterprises which will be of benefit to the State. He is very much interested in the beet-sugar industry. Since his return from Europe he has expressed himself in favor of building one or more factories. He does not know himself where they will be. I left him in Stockton last Friday. He then told me that he intended to visit several sites."

NOTICE

COFFEE PLANTERS.

Hulling and Cleaning Coffee.

We are prepared to handle COFFEE in the cherry and hull, with the latest improved machinery.

Send us your COFFEES, either direct or through your agents.

COFFEE taken from ship's side, hulled, cleaned and delivered to any designated warehouse in this city.

No charge for insurance and storage while COFFEES are in our mills.

HEADQUARTERS,"

and is replete, as usual, with an excellent variety of HOLIDAY GOODS of new and attractive styles, direct from New York and Philadelphia to suit all ages and all purses. Special care has been given to the line of DOLLS—the pride of every little girl's heart—and the assortment, ranging from 2½ to 30 inches, is probably better than ever before.

The variety of Toys, Games, Blocks, Wagons, etc., are as full, if not fuller than ever, while the collection of HOLIDAY BOOKS in new and tasty bindings, ARTISTIC CALENDARS, BOOKLETS,

CHRISTMAS AND NEW YEAR'S CARDS, Ladies' and Gents' LEATHER GOODS of finest make, CREPE TISSUE PAPERS, HIGH CLASS STATIONERY, etc., etc., enables us to confidently claim the attention of holiday buyers thereto.

Orders from the other islands given careful attention both as to selection and packing for shipment.

Timely Topics

THE
AERMOTOR

-- AND --

Steel Tower.

In as much as most of our remarks have been confined to the pumping Aermotor we wish to call your attention this week to the geared motor for barns. Undoubtedly sometime in the past you have concluded to equip your mill with shafting for grinding of corn and feed for your stock, and perhaps attach a grind stone and buzz saw, and sent away for a catalogue for estimated cost and the location of your building for horizontal and vertical shafting, but finally came to the conclusion that the cost and difficulties of constructing were too great to warrant the expenditure. Now here is where the Aermotor does away with all those great obstacles and petty annoyances. In our plan you have only to secure the vertical 8x8 mast in position, put the Aermotor on one end and the grinder on the other. The mast then holds it all. You can belt to different machines and drive your pump and feed grinder at one time. The feed grinder is always in position. You have only to turn a hand screw to adjust the lower grinding ring sufficiently close and it is already for use, or in an instant you can put on a belt to run any other machine. The saving of power effected by having all bearings rigidly connected in one casting and therefore in proper place, is no less important than the matter of convenience allowed too. The Aermotor runs in half the wind required by other mills, and regulates in a strong wind as well as in a mild wind. It handles the pump the smoothest of any mill made. An eight inch stroke Aermotor will throw more water with less wind than any of the old style mills.

If you are in need of a mill buy an Aermotor and your neighbors will congratulate you on your foresight.

THE . . .

Hawaiian Hardware

COMPANY, L'D.,

Opposite Spreckels' Bank,

307 FORT STREET.

LOCAL BREVITIES.

The planters meet again at 10 this morning.

Robert Cotton has the agency for Costa's coffee pulpers.

The initial number of the Hilo Tribune came by the Kinau.

Teachers' examination for primary grade on January 3d and 4th.

The Christmas vacations in the public schools will begin December 20th.

The Coptic, due next Thursday, will be the next steamer from the Coast.

The Hobron Drug Co. say they have a full supply of Mellin's and other infant foods.

Mr. and Mrs. G. P. Wilder were registered at the Grand Hotel, Yokohama, Japan, on November 4th.

The first installment of Japanese upholstered furniture ever shipped to the islands, came by the Mount Lebanon.

The steamer Hall will not leave until Wednesday morning, necessary repairs preventing her departure on schedule time.

When the Kinau left Hilo there was no change in the volcano, dense volumes of smoke continue to pour from the crater.

Mrs. George Barker, a resident of Kukui street, was found dead in bed at 9 o'clock yesterday morning. Death resulted from heart failure.

A number of sugar plantation managers came by the Kinau in order to attend the annual meeting of the Planters' Labor and Supply Company.

Peruvian Bitters need no endorsement. It has no equal as a tonic. The Hobron Drug Company sell it. Try a bottle and brace up.

It is getting quite the fad for bicyclists to wear buttons upon which are stamped the names of their favorite wheels. Some of these are quite artistic.

Will T. Dorrance, formerly connected with the San Francisco Examiner, has accepted a position as business manager of The Time. The paper will be issued Tuesday.

Captain Freeman came down from Mahukona by the Kinau yesterday. He has been absent for three weeks at that place assisting in discharging machinery from the Olga.

For four days previous to the departure of the W. G. Hall from Punaluu, rain came down in such torrents at Kapapala ranch that it was impossible to go out of the house.

The time of the Circuit Court was taken up all day yesterday hearing the case of C. B. Maile, et al., vs. Chin Wo Company, an action of debt for \$277.50. Unanimous verdict for plaintiff.

August Conradi, who arrived from Kauai Sunday morning, will take a position with the Union Feed Co., succeeding Dan Vida, who has gone to San Francisco to take a business course.

It is rumored that the Eagle House and the Queen Hotel, both on Nuuanu street, are to be joined in a short time by W. H. Rice, Jr., of Lihoe, at present manager of the Fairview Hotel at that place.

There will be Thanksgiving services in Central Union Church at 11 o'clock Thursday morning, subject: "Christian Citizenship." Several local clergymen will be present and participate in the services.

James Charles Prevost, ex-registrar of British Columbia, pleaded guilty to embezzling some \$5000 belonging to the Government and was sentenced to four years' imprisonment in the penitentiary.

Dr. W. L. Moore, oculist and aurist of Hilo, who came down with the D. H. Hitchcock party by the last Kinau, will leave by the Hall tomorrow, stopping off at Lahaina for a few days before returning home.

Purser Humphreys of the Warrimoo has been confined to his bed for the past ten days with a severe attack of inflammatory rheumatism. Notwithstanding his illness the genial officer manages to discharge the arduous duties of that position.

G. E. Boardman, agent for Ogura & Co., has a notice elsewhere in this issue regarding laborers for the planters. Mr. Boardman returned recently from the Orient, and is prepared to furnish any number of laborers under a very practicable plan.

The Hilo branch of the Hollister Drug Company, with E. B. Barthrop as manager, has commenced business. Yesterday the residents of the city of expectation were treated to fresh soda water for the first time. As there was no charge for the deli-

cious beverage furnished that day, almost all the people of that burg took advantage of the opportunity.

Sam. Pearce, a member of the Anglican Church choir, is quite ill at his father's home on Hawaii. It is said that he was stricken with paralysis prior to his departure.

Mr. C. R. McVeigh, who returned by the Mariposa, reports good progress on the disinfecting plant. It is to arrive by the Martha Davis, and he will commence work on the same immediately on arrival.

Among the cargo of the Kinau were several hundred cases of merchandise which had been sent to Hilo by sailing vessels during the cholera scare in Honolulu. The articles could not be sold in the rainy city, and had to be sent here for disposal. There are eighty cases of bread in the lot.

One of the best drills of the Mounted Reserve since its beginning took place Saturday afternoon. Twenty-eight men turned out. Command was taken alternately by Lieutenants Dillingham and Perry. After a drill on the Makiki baseball grounds the Reserve repaired to Punahou pasture for target practice.

The Pacific Tennis Club and lady friends were kindly invited to the courts of the Beretania Tennis Club Saturday afternoon. The courts were kept busy until nearly dark. Some of the sets played were very close and interesting. Tea was served on the lawn during the afternoon, and a pleasant converse indulged in by the many ladies and gentlemen present.

RECEPTION UP THE VALLEY.

Pleasant Occasion at J. T. Waterhouse's Last Night.

The hospitable home of Mr. and Mrs. J. T. Waterhouse, in Nuuanu Valley, was thrown open from 8 to 10 last night for a reception to meet Mr. and Mrs. Frederick Waterhouse. The drawing and sitting rooms were made one; the hall leading past the two was neatly decorated with potted palms and ferns. Chairs were placed on the front veranda for accommodation of the guests. The Kawaihau Club, stationed on the lawn in front of the house, furnished music for the occasion. Delightful refreshments were served during the evening. Among those present were: Mr. and Mrs. Frederick Waterhouse, Mr. and Mrs. J. T. Waterhouse, Dr. and Mrs. Day, Dr. and Mrs. Ryder, Mr. and Mrs. E. A. Jones, Miss Richards, Miss McGrew, Miss Crane, Misses Hartwell, Misses Ladd, Misses Carter, Miss Belle Walker, Miss Fuller, Miss Green, Misses Hopper, Misses Wright of Kohala, Miss May, Judge Frear, Prof. Wood, Prof. French, Armstrong Smith, W. F. Dillingham, Charles Hyde, Paul De La Vergne, Willard Brown, W. Chamberlain and B. Marx.

ROBBED HIS FRIEND.

Had a Good Time on the Money, Then Arrested.

Keau, a native, was arrested by Detective Kaapa yesterday morning for stealing \$11 from Kabelekaiahulu, a friend last Saturday night. The circumstances of the case are rather interesting. The two men were out for a "time" and visited the house of a friend. While there the man with the lengthy name, who had been taking a little too much gin, fell asleep on the floor. Keau saw a chance to get some money which he knew was in the possession of the sleeping man. He feigned drunkenness and went to sleep alongside of his friend. When Kabelekaiahulu awoke Sunday morning he found \$11 missing. Keau had a fine time with his friends Sunday, to several of whom he gave fifty cents apiece. He evinced some surprise at being detected, but went quietly to the police station.

CASH REGISTERS FOR HAWAII.

W. C. Weedon Appointed General Agent—Traveler Lingham.

W. A. Lingham, general traveling agent for the National Cash Register Company, Dayton, Ohio, was a through passenger by the Warrimoo. During his brief stay in Honolulu, Mr. Lingham appointed W. C. Weedon general agent in Hawaii for the National registers.

Mr. Lingham ably represents that worthy specimen known as the hustling American. He travels constantly, and is now on a trip which will require more than two years to complete. As a linguist the traveler is particularly blessed, being able to converse in twenty different languages; besides, he is as genial and interesting as it is possible for one to be.

NEWS BY WARRIMOO.

Kate Marsden Abandons Suit Against the London Times.

West Indian Planters Object to Bounties—Unlucky Thirteen—Billiardist Ives Loses—Wales' Birthday.

The suit for libel which Kate Marsden instituted with such a flourish in 1894 against the London Times has just been abandoned. The suit was brought as a result of the report of Rev. Mr. Francis, rector of the American Church of St. Petersburg, published in the Times of August 16th, last year, which reads in brief: "The committee of Kate Marsden's friends formed in St. Petersburg in December last to inquire into serious charges made against her in England, America and New Zealand, have concluded their labors, the result being communicated to Miss Marsden's London committee, who will recognize that Miss Marsden's work must be closed and that the committee must immediately dissolve."

Miss Marsden in making the announcement of the abandonment of her suit against the Times says she intends to resume her work for the lepers.

Truth thereupon remarked: "This under the circumstances, is a piece of unwarrantable impudence. Nobody in his senses will contribute a half-penny until she clears her reputation."

Miss Marsden, who is about forty years of age and the daughter of a London lawyer, so interested the public in her work that at one time the Princess of Wales was prevailed upon to give her a letter to her sister, the Carina, which paved the way for the nurse's work among the lepers.

WEST INDIA PLANTERS.

A Deputation Asks for Relief from Existing Causes of Depression.

LONDON, Nov. 14.—A deputation of West Indian merchants and planters called today at the Colonial office and had an interview with the Secretary of State for the Colonies, Right Hon. Joseph Chamberlain. The spokesman of the delegation urged that injury was being done to the West Indies by the bounties given for sugar production in Europe. Mr. Chamberlain promised to submit to his colleagues the views of the deputation, but pointed out that in respect to some of the depositions it might be possible to make their prospects less bound up in sugar planting.

Mr. Chamberlain referred hopefully to the prospect for gold mining in British Guiana, and expressed the opinion that there was no chance of getting the House of Commons to sanction the countervailing duties in order to force foreign governments to stop giving sugar bounties. Continuing, Mr. Chamberlain said: "Our only influence rests in persuasion, and it is best to leave the foreign governments to be influenced by their own financial embarrassment."

Seattle's New Drydock.

SEATTLE, Wash., Nov. 12.—The government dock at Port Orchard will be completed this week. It is expected that the great gate will be placed in position on Thursday, and this will be the last work done on the dock. Dredging for the channel leading for the sound to the entrance of the dry dock is well under way, though this is not part of the original contract. Messrs. Byron, Barlow & Co. are the builders.

It is probable that the officers of the flagship Philadelphia and Rear Admiral B. A. Beardslee of the Pacific squadron will, according to a dispatch received by General Metcalf this morning, arrive on Friday, and will participate in the exercises consequent upon the completion of the dry dock. The Philadelphia reached Everett today.

Victoria Defies Unlucky Thirteen. LONDON, Nov. 16.—As if in defiance of the ill luck which is said to accompany the number 13, Queen Victoria today returned to Windsor Castle from Balmoral in a special train consisting of thirteen cars, one of which was the handsome large saloon car set apart for the use of Her Majesty, the other carriages containing the members of her suite, servants, baggage, etc. The Queen's car was fitted up as a library and dining room, richly upholstered in white-silk fern, embroidered with gold.

May Call Him Shakespeare.

LONDON, Nov. 16.—The Emperor William of Germany sent a special courier to San Francisco with a birthday gift for the Prince of Wales, who was 54 years old on Saturday last. The Emperor is also said to have written to the Prince expressing the hope that the Duke of York's next son will have the name of Shakespeare bestowed upon him among other names.

Ives Plays Unsteadily.

NEW YORK, Nov. 16.—The five nights' billiard match between Frank Ives and Thomas J. Gallagher, at Daly's academy, ended last night. Ives undertook to play 3000 points, 14 inch ball five, against 1200 by Gallagher, and lost. He made 2323 and was beaten 677 points.

Social Science Club.

The regular monthly meeting of the Social Science Club was held last evening at the residence of J. B. Atherton. Mrs. McCully-Jiggins entertained the members. Dr. C. T. Rodgers read a paper on "Earnings," which dealt with the question whether accumulations of wealth, forty millions or more, were legitimate. Dr. Rodgers treated the subject in a masterly manner, that gentleman being at his best on treatise of the kind. The paper was listened to with much interest by those present.

KILLED BY FALLING DIRT.

Laborer at Waianae Meets with a Fatal Accident.

A most distressing accident happened at Lutualei, Waianae, shortly before 11 a.m. yesterday. A number of laborers were working on a bank digging out dirt to ballast portions of the Waianae railroad. A portable track had been placed at the bottom in order to remove the dirt in cars. While the men were at work a car was standing on the track opposite the spot. Without warning, the dirt from above came down with tremendous force. All the men except Antonio Patrice succeeded in getting out of the way of the landslide. This poor unfortunate ran directly for the car and was pinned in by the falling dirt. Upon being removed it was found that a bolt sticking through the man's body in the region of the abdomen. His backbone was also found to be broken. Patrice was taken to the dispensary. He called for a glass of water, and, before this could be brought him, expired. At a coroner's inquest held in the afternoon the verdict of accidental killing was rendered. Deceased leaves a wife and seven children. The remains were buried in the Catholic cemetery at Waianae.

FUNDS FOR LEPEBS.

Wray Taylor's Annual Entertainment—Miss Field Will Assist.

Wray Taylor has fixed on Tuesday evening, December 10th, as the date on which he will give his annual entertainment to raise funds for a merry Christmas for the lepers at the settlement on Molokai. It will probably take place in Kaunakapili church. A varied and pleasing program will be prepared for the occasion. Miss Kate Field, the distinguished writer, has very kindly consented to assist in the program. A lady violinist will make her first appearance at this entertainment, full particulars of which will be given later. Tickets, which will be ready in a day or so, will be fifty cents.

This is an entertainment everybody should attend, and which will be up to the usual high standard of the performances given by Mr. Taylor.

MRS. LILLIE INJURED.

Broke an Ankle While on the Warrimoo.

Among the passengers by the Warrimoo were Mr. and Mrs. R. I. Lillie. Mrs. Lillie has not been in good health for some time, and consequently compelled to seek other climes in the hope of bettering her condition.

Shortly after the Warrimoo sailed from Vancouver Mrs. Lillie had the misfortune to slip and fall while promenading the deck, breaking an ankle. The wound proved to be very painful and though every care was given the injured member, it will be some time before the lady will be able to walk.

Death of a Good Woman.

Kawaimaka, a native lady, 86 years of age, died at Manana, Ewa, last Friday and was buried at 3:30 p. m. Saturday. Deceased leaves a husband, daughter and brother to mourn her loss. She was endeared to all who knew her by her great charity and benevolence. She was connected with the Ewa church for many years as one of its leading members and was most zealous in the cause of Christianity. She had been suffering many months, but bore all with the greatest patience.

Thanksgiving at Kawaihau.

The girls of Kawaihau seminary will give their usual Thanksgiving entertainment at 7:30 p. m., November 29th, at the seminary. The program will consist of cradle songs of different nations, in costume, choruses and other musical numbers. Previous events of the kind given by the Kawaihau girls have proven a great success. The last entertainment in the drill shed is remembered with pleasure by a great many.

Contemplated Improvements.

James Steiner contemplates erecting a building on Hotel street to be used as an ice cream parlor and restaurant. The lower floor will be open on the plan of a garden, while the upper portion, which will be used in inclement weather or when the temperature makes a seat indoors desirable. Mr. Steiner's plans are not fully matured, but he expects to make it a resort on the same plan as some of the swell cafes in the States.

MRS. LOULIE M. GORDON.
One of the prominent women at the Atlanta Exposition is Mrs. Gordon, chairman of the Committee on Congresses. She is a Georgia woman and her father was a major in the Confederate army. Her husband, Walter Gordon, died a number of years ago. She was one of Georgia's representatives at the World's Fair and has done considerable newspaper work.

Daily Advertiser 75 cents a month. Delivered by carrier.

BY SOCIETY OF MAUI.

Mr. and Mrs. Colville Given a
Royal Welcome.

SAD DEATH OF MR. PLUNKETT

James Boyd Looking Over the Roads
of Makawao—Tax Appeal Board to
Meet—Herbert Dickey Playing Foot-
ball—General News Notes of Maui.

MAUI, Nov. 23.—During Fri-
day evening, the 22d, a reception
was tendered Mr. and Mrs. J. W.
Colville by Mr. and Mrs. D. C.
Lindsay at Paia. It was a swell
occasion, as receptions always are
in Makawao; old friends were not
only glad to welcome home Man-
ager Colville after several months'
absence in Scotland but were de-
lighted to greet the lady who had
recently become his life partner
for weal or woe. People from
Wailuku, Kahului, Spreckelsville,
Haiku, Paia, Hamakua and
mauka Makawao were there. The
exterior of the house was prettily
adorned with Japanese lanterns
and the doorways draped with
British and American colors. The
evening air was so still that it was
enjoyable to lunch and chat at the
tete-tete tables placed here and
there on the verandas. A game of
questions and answers did away
the formality always attendant
upon such occasions, and the hours
between 8 and 10 were most pleas-
antly passed.

During Friday, the 15th inst.,
Robert Plunkett of Huelo, an
America of about 60 years of age,
died of heart disease. Huelo is an
inaccessible, lonely spot, and the
weather of the 15th was so inclem-
ent that no priest or minister
could be summoned. Conse-
quently the funeral ceremony was
rather a pitiful one. An Hawaiian friend
offered a prayer, some women sang
a native hymn and the only for-
eigner present read the burial ser-
vice. Mr. Plunkett was a kamaaina
and has done many years' faithful
service as a superintendent of
Spreckels' ditch.

Edward Bailey of Oakland is
visiting his son E. H. Bailey of
Wailuku.

Senator Hocking looks well after
his prolonged stay at the capital.

Herbert Dickey is now half-back
on the Chicago University football
eleven. C. W. Dickey is employed
in an office of a prominent San
Francisco architect. Both of the
above are Maui boys.

The thermometer registered 58°
several mornings in Makawao dur-
ing the past week.

Samuel E. Kalama has received
a commission as poundmaster for
Makawao.

On Thursday, the 21st, James
Boyd of the Interior Department,
accompanied by members of the
Makawao Road Board, thoroughly
examined into the condition of
roads intersecting Kula homestead
lands. He found the grades bad
and the roads poor.

George Schroeder of Wailuku is
acting as substitute in the Kahului
school during the absence of Miss
Mossman in Oakland.

The Tax Appeal Board of Maui,
presided over by Judge Kalua, will
meet at Makawao court house on
Monday, the 25th. There are ap-
peals to be heard in Wailuku, but
none either in Lahaina or Hana.

Friday, the 29th, the November
evening of the Makawao Literary
Society, will take place at the resi-
dence of H. P. Baldwin, Haiku.

Wailuku's portable jail is well
high completed.

Weather—South wind now and
then during the week; pleasant and
cool today.

Stabbing Affray at Moiliili.

There was a bloody stabbing af-
fray at Moiliili Saturday night.
Shortly before 7 o'clock Kanaana,
who had been taking sundry drinks
in town, returned to the bosom of
his family with some fish for the
evening meal. Kaleiheana, one of
the male occupants of the house,
asked Kanaana what he meant by
being so long with the fish for din-
ner. The tone of voice used did not
suit the fancy of Kanaana, and he
replied in a very surly tone that
that was his business. Then and
there an argument arose. So in-
censed was Kanaana that he drew
a knife and cut at Kaleiheana, suc-
ceeding in making an ugly gash in
that unfortunate man's forehead
and another in the region of the

abdomen. Kaleiheana came toward
town immediately. On the way he
met a mounted patrolman, who
went to the scene of the encounter
and arrested Kanaana. The victim
of this frenzied man's actions is
now in the hospital.

Police Inspection.

The police numbering forty in
all were given inspection and drill
by Captain Parker in the police
station court yesterday morning.
Among those present were Presi-
dent Dole and Minister Cooper.
The inspection was in three parts
—first in full dress uniform, sec-
ond in fatigue and third mountain
uniform. The last was by far the
most attractive. The men came
out dressed in blue jerseys, blue
trousers, brown leggings and white
soft hats. Each carried a canteen,
blanket and rifle. They were put
through the manual of arms and
bayonet exercises which they did
well. After police inspection Presi-
dent Dole went the rounds of the
cells and expressed himself as very
much pleased with their condi-
tion. Their scrupulous cleanli-
ness is due in a great measure to
the work of Turnkey Evans.

JACK HALL RETURNS.

No Intention of Jumping Bail.
A Little Vacation.

"How do you do Jack Hall,"
said a burly native policeman to a
clean shaven youthful looking man
at the side of a Kau policeman on
the W. G. Hall Friday shortly
after the arrival of that vessel in
port. "You have come back to
your 'Bird Cage' and sweetly
singing canaries? Well, good luck
to you Jack, but come along let's
go up to the police station and
arrange for a cot upon which you
can rest your weary head."

And sure enough, there was
Hall standing on the steamer's
deck dressed in riding costume.
His moustache was shaven and his
looks otherwise changed but there
was no mistake as to his identity.
"I'm glad to be back," said Jack
with mock gravity. "I got tired of
Maui and Hawaii and came back
with a friend who claims the dis-
tinction of being the crack police-
man on the Kailua force."

"You see, it was this way. I
didn't mean to jump bail. If I
had I would not have remained on
the islands. I went up to Maui on
the W. G. Hall four weeks ago, to
look for a job. After visiting a
friend at Spreckelsville plantation
I went up to Kailua, Kona, and
oh, but I did have a good time. I
saw what there was of that Jay
town now, you bet. I explored
every place in and out of town.
But no, I couldn't stand it, I pined
for Honolulu and here I am."

Sam Haania, the native police-
man who brought Hall down, had
the following story to tell: "Before
the arrival at Kailua of the W. G.
Hall we received a telephone mes-
sage from Sheriff Yates at Waio-
hinu saying that there was a much-
wanted man aboard that steamer.
It seems that Hall had been to Kau
and no one knows where else. At
Kailua the deputy sheriff of Kona
went aboard and found Hall in a
stateroom. I was sent down with
prisoner. He gave the name of
Jack Williams and said he was
going to Maui to look for a job."

John Kuaana and J. L. Kaulu-
hou, Hall's bondsmen, surrendered
bail and the former keeper of the
"bird cage" was taken away from
the hurly-burly of the outside world
to meditate on the whys and where-
fores of island travel.

Thanksgiving Day.

Thanksgiving Day in the United
States originated in 1621. At first
the practice of observing the day of
Thanksgiving in the autumn of every
year was confined to New England,
but it has now become national, the
President appointing by proclamation
the last Thursday in November as a
day for national Thanksgiving.
The first national English Thanksgivings
were offered at St. Paul's Cathedral,
for the defeat of the Spanish Armada,
on the 8th day of September and
November 24, 1588.

HOW TO PREVENT CROUP.

SOME READING THAT WILL PROVE
INTERESTING TO YOUNG MOTHERS
HOW TO GUARD AGAINST THE DIS-
EASE.

Croup is a terror to young mothers
and to them concerning the cause,
first symptoms and treatment is the
object of this item. The origin of
croup is a common cold. Children
who are subject to it take cold very
easily and croup is almost sure to fol-
low. The first symptom is hoarse-
ness; this is soon followed by a pecu-
liar rough cough, which is easily re-
cognized and will never be forgotten
by one who has heard it. The time
to act is when the child first becomes
hoarse. If Chamberlain's Cough Rem-
edy is freely given all tendency to
croup will soon disappear. Even
after the croupy cough has developed
it will prevent the attack. There is
no danger in giving this remedy for
it contains nothing injurious. For
sale by all dealers. BENSON, SMITH

OF INTEREST TO MANAGERS
OF PLANTATIONS.

A Model Plant is not complete without
Electric Power, thus dispensing with
small engines.

Why not generate your power from one
CENTRAL Station? One generator can
furnish power to your Pumps, Centri-
fugals, Elevators, Plovers, Railways and
Hoists; also furnish light and power for
a radius of from 15 to 20 miles.

Electric Power being used saves the
labor of hauling coal in your field, also
water, and does away with high-priced
engineers, and only have one engine to
look after in your mill.

Where water power is available it costs
nothing to generate Electric Power.

THE HAWAIIAN ELECTRIC COMPANY
is now ready to furnish Electric Plants
and Generators of all descriptions at short
notice, and also has on hand a large
stock of Wire, Chandellers and all Elec-
trical Goods.

All orders will be given prompt atten-
tion, and estimates furnished for Lighting
and Power Plants; also attention is given
to House and Marine Wiring.

IN THEIR NEW HOME.

Members of the Christian Church
Are Established.

FIRST SERVICE HELD SUNDAY.

Rev. T. D. Garvin Tells Why They
Are Here—Not Begging Assistance.
An Opportunity to Work with
Others—Description of Edifice, Etc.

What had been the dream and
prayer for years of several members of
the Christian Church was realized
Sunday, when the doors of their
new tabernacle were thrown open for
public worship.

The interior of the building was

THE NEW TABERNACLE OF THE CHRISTIAN CHURCH
WHICH WAS OPENED FOR WORSHIP SUNDAY.
(Sketches by the ADVERTISER artist.)

elaborately decorated with a profusion
of white and yellow chrysanthemums
and potted palms. The pastor took
for his text 1st Cor. 3-11, "The one
foundation, Christ," from which he
preached an earnest and impressive
sermon. The music, which was under
the leadership of Miss Haman was
mainly congregational; one anthem
"Seek ye the Lord," being rendered
by a quartet. The new edifice is situ-
ated on Alakea street near the corner
of King and presents a neat and com-
modious appearance from the outside,
and is tastefully and advantageously
arranged inside, having class rooms
on either side of the pulpit divided
from the main auditorium by means
of folding doors which are removed at
will, and the whole thrown into one
room which will furnish seating cap-
acity for all present needs of the con-
gregation.

The windows which are mainly of
cathedral glass are partly of Gothic
design and add much to the general
appearance of the structure. A single
window in the right and front corner
in which is a handsomely wrought
anchor, is the gift of Lieut. Harry H.
Stilleman and several other members
of the congregation; also H. B. M.
S. Hyacinth, and Rev. Eric Lewis,
all of whom wished to have a part
and assist in the building.

The window is an ornament and an
appropriate memorial for the donors.
In the center of the church front is a
large Gothic group of three windows
also made up of neat patterns of
cathedral glass. Immediately back of
the pulpit is a memorial window to
Mrs. Kate B. Tempest, presented by
her family. In this is wrought an
open bible, over which is a jeweled
crown, the whole being encircled by a
halo. It is a splendid specimen of the
window maker's art. The electric fix-
tures, now on the way, are furnished
by friends in Cleveland, O.

The interior finish of the building,
papering, varnishing, etc., is the work
of J. Z. Deas, late of Portland, Or.,
and is a creditable piece of workman-
ship. The furniture has largely been
the gift of individuals, a communion
table being given by members of Mr.
Garvin's former congregation in San
Francisco. The pulpit desk is the gift
and handiwork of R. J. Green of this
city. It is made of native woods
highly polished, and is a handsome
piece of furniture. A silver com-
munion set is the gift of Miss Fanny
Coulter of Los Angeles, Cal. It is in
this way that the church has been
furnished, mainly, and the congrega-
tion is devoutly grateful to all who
have contributed in any way to equip-
ping it for religious work.

During the opening exercises the
pastor made a few remarks expressive
of thankfulness to the generosity of all
who had contributed to the building
of their new home, and referred very
touchingly to the gifts of various parts
of the furniture. He stated that there
would be no begging for money
during the day beyond the customary
collections. The small amount of
debt remaining will be provided for
outside, and that all who were inclin-
ed to come in and attend were wel-
come and free, and all seats were free
and every one was left to give or help
as his circumstances and conditions
prompted.

A synopsis of Mr. Garvin's sermon
is given as follows: I realize your
right to inquire the character and
teaching of any man who comes
among you to teach you or your chil-
dren; to inquire why he says so, and
if he has any good, to enjoy it, and if
better than you had before, to accept it,
and if not so good to reject it.

In this age you have a perfect right
to inquire of any people what do they
say and why is it said, and you have
a right to know the character of our
preacher. It is your duty to hear, see and
know what we who profess to preach

the gospel to the world have to offer.
A foundation is needed for any per-
manent structure. The only founda-
tion of the gospel was the savior. The
apostle inquired of them of Corinth! Who
is Paul? Who Apollus? and said I have
planted, Apollus watered but God gave the
increase. They had simply been laborers
together with God. There was no founda-
tion but Christ. God laid the one corner
stone, chosen and precious, Christ Jesus
the righteous, and there was no other founda-
tion. Then the building must commence
here, and the turn of the whole scale
is acceptance of the Christ, which
brings an eternal home in glory, and
the building upon the right founda-
tion and conforming the life to Christ
results in life everlasting.

On the one foundation you can put
but one building. Anything in the
building without faith in Christ cannot
be built upon Him, and no other
foundation can man lay than that is
laid.

Why are we in Honolulu? Some
said we were not needed; others said
we would do damage, and others
wished we had not come. We came
to visit, but we decided to stay and
work. Time tries all things and works
many changes. All I ask of the peo-
ple, all I desire to ask, is hear what
the word of the Lord says and do

to go where the will directs? Our plea
is for a reconsideration of the whole
question that whosoever the word
leads I'll follow. Are you ready for
that? Not as I may translate the
word, but just as God has given it.
This work to be accomplished cannot
be done in a day.

We must rally round the cross and do
what the word of God demands; follow
the old survey line by line; the chil-
dren will see it and others will see it
and come to the true fountain and
help many turn to the living God; re-
joice in the Lord Jesus and follow the
divine rule. Then rally, rally round
the church; rush forward, the car of
salvation only be bound to God by his
word and be loyal to Christ.

With an earnest closing appeal to
those present to identify themselves
with church and church work, and
the singing of the hymn, "Just as I
am," the congregation assembled for
communion, stating that they were
neither open or close communionists.
We do not unchristianize any person;
all that love Christ and follow Him to
the best of their ability must decide
their right to partake, and many re-
mained and participated.

A COMPLETE WRECK

A Story of Peculiar Interest to
Women.

How the Life of a York State Woman
was Wrecked—Life Lost Its Joy—
But the Clouds Passed and
Happiness Came Again.

(From the Binghamton, N. Y., Republican.)

We have heard so much talk throughout
the county of late concerning Mrs. Martha
Gates of Maine, Broome County, N. Y., that
yesterday a reporter of the Binghamton Re-
publican, interviewed her for publication,
and her story which will interest all women,
is as follows:

"I was born in Hartford, Cortland County,
New York, 42 years ago. I have been
married 21 years and am the mother of
eight children. About two years ago I was
afflicted with troubles incidental to my sex
and suffered agonizing pain. The trouble
continued to grow worse, until last winter
I was compelled to take to my bed. I called
in a regular physician, but his treatment
did not seem to do me much good, and only
relieved me for a little time, after which
my condition became worse than before. I
was confined to my bed for three months
and was absolutely unable to attend to my
household duties. I could hardly feed my-
self so weak had I become. I had to be
waited upon day and night and was a
physical wreck. There was a great deal of
doubt about my ultimate recovery. The
best hope the doctor could hold out to me
was that I might be able to get around again
and attend to my household duties after
remaining in bed a few months longer. But
instead of getting better I grew steadily
worse. One day I happened to read in the
paper about Dr. Williams' Pink Pills for
Pale People and decided to give them a
trial. Immediately after taking them and
before I had used a half a box I saw a
marked change for the better in my condi-
tion. All this time, however, I was confined
to my bed. I continued taking the medi-
cine until I had used four boxes and by
that time I was able to be about and
around again. The improvement has been
steadily ever since. I am still a little weak,
but growing stronger every day. I have
also used them for my daughter, aged 19
years, who has found them very beneficial
for troubles incidental to her sex. So far
as I am myself concerned I consider it a
wonderful cure."

Mrs. Gates has lived in North Maine for
many years, and is highly respected. Any
statement she makes is cheerfully acquiesced
in by her friends and acquaintances.

An impoverished condition of the blood,
or a disordered condition of the nerves, is
the fruitful source of most of the ailments
of mankind, and to any thus afflicted Dr. Wil-
liams' Pink Pills offer a speedy and certain
cure. No other remedy has ever met with
such great and continued success, which is
one of the strongest proofs that Dr. Williams' Pink Pills
accomplish all that is claimed for them.
They are an unfailing cure for leucor-
rhea, catarrh, neuralgia, rheumatism, ner-
vous prostration, diseases depending upon
overwork, or excess of any nature.

These pills are manufactured by the Dr.
Williams' Medicine Co., Druggists, Canada
and 46 Holborn Viaduct, London, Eng.
They are put up in round glass bottles, the
wrapper covers which bears the full trade
marks, "Dr. Williams' Pink Pills for Pale
People." As there are imitations of this
wonderful remedy, see that the above trade-
mark is on every package you purchase, and
promptly refuse all imitations and substitu-
tes.

Dr. Williams' Pink Pills are sold by The
Hottel Drug Co., Honolulu, wholesale
agents, and all dealers in medicine.

Assignee's Notice.

THANKSGIVING.

SPECIAL NO. 1.

Keep
Him
Home

If there's one way of inducing
a man to stay at home, it's to
make home comfortable for him.

Just imagine papa, hubby or
brother trying to resist the tempta-
tion to lay off on one off our

PORTIERE DIVANS

He simply can't do it, and
when you own up to him that
you only paid

\$12.00

for it, if it's hubby, he will pass
off into a dream of his bachelor
days, only to awake and offer
thanks for the great change and
comforts of home.

Sit beside him in one of our
handsome

WICKER ROCKERS
OR WICKER CHAIRS

Tell him you bought it for only

\$5.50

and you will awaken an interest
in him for the comforts of life.
You will be surprised at the
effect.

TRY IT, IT WILL KEEP
HIM HOME.

THE PERKINS
WINDMILL

Is new in this country, but in the
United States, THOUSANDS are in
use, and on account of their superior strength and easy
running qualities, they have taken FIRST RANK among
windmills.

We have just received a car load of Mills and can fur-
nish on short notice STEEL GALVANIZED MILLS of 8, 10, and
12-foot diameter and WOOD MILLS of 8, 10, 12, 14, 16 and 18-
foot diameter. We have DIRECT MOTION windmills for
places where there are steady strong winds, and geared mills
which will run in very light winds, but cannot pump so fast
as the direct motion mills. Some of our mills have oiled
bearings of the most approved kinds, and some the CELE-
BRATED GRAPHITE BEARINGS, which will run for years with-
out any oil; also STEEL GALVANIZED TOWERS,
30 and 40 feet high.

SEND FOR THE

Perkins Catalogue

And read the description of the geared mills
for farmers and stockmen. With the use of
shafting and pulleys they can be made to
grind corn or barley, cut fodder, turn a grind-
stone and saw your wood.

Wooden Towers can be erected if pre-
ferred, and we give directions for the the
timber and erection. We have also Gould's
Lifting and Force.

PUMPS

for house or windmill
use. We can furnish
redwood tanks, also,
of all sizes from 600 gallons to 10,000 gallons
made in the best way and of the best clear
redwood.

The perfect satisfaction that the Perkins
Windmills and the Goulds Pumps have given wherever
they have been used and properly adjusted is a guarantee
of their success. Try the Perkins Mill and get something
that will stand the strongest wind and yet work well in
the lightest Southerly wind.

E. O. Hall & Son, Limited,

AGENTS.

GIVE US ANOTHER SHOT AT YOU . . .

"KOMBI" and Pocket Kodak.

Every one who saw our "NO. 2 BULLET" was more than pleased with the work
done by them. The only fault we had to find was that we did not have enough of
them to satisfy the demand. Come and look at the

POCKET KODAK \$5.50.

Loaded for Twelve Pictures.

Makes pictures large enough to be good for contact printing and good enough to
enlarge to any reasonable size. "One button does it. You press it." Weighs only
five ounces. HERE! ANOTHER!

Kombi! Kombi! Kombi!

Loaded for Twenty-five Pictures.

This little camera can be carried in the pocket. Nothing is left undone to make it
a perfect little gem of a camera. Can be used as a snap shot or time exposure. So
simple that a boy or a girl can use it. Twenty-five perfect exposures one loading.
Every KOMBI guaranteed.

Both of these Cameras can be loaded or film changed in daylight. We have on
exhibition an assortment of pictures taken with these cameras which are perfect in
every detail.

HOLLISTER DRUG COMPANY.

The PACIFIC HOSPITAL STOCKTON, CAL.

—UNDER THE MANAGEMENT OF—
DR. F. P. CLARK, Medical Dept. DR. G. A. ROGERS, Asst. Physician. DR. S. CLARK, Business Manager.

PRIVATE HOSPITAL for the CARE and TREATMENT of MENTAL and NERVOUS
DISEASES, MORPHINE and COCAINE HABITS.

THE Proprietary Institution known as The Pacific Hospital is especially devoted to the care
and treatment of Mental and Nervous Diseases. The buildings are spacious and comfort-
able, having been constructed for the accommodation of over 100 patients, and they are pleasantly
situated in the suburbs of Stockton, and surrounded by attractive grounds of 40 acres in extent,
with cultivated gardens and pleasant walks. Its advantages over public institutions is in the
admission and procuring extra accommodations, if required, are obvious. For terms and other
particulars apply to the Management. REFERENCES:
